

Crop and Livestock Production Dashboard

Overview

This dashboard provides a comprehensive analysis of crop and livestock data from Crop Production, focusing on production, area harvested, and yield trends across countries and years. It highlights key performance indicators, compares leading items and regions, and uncovers trends and anomalies in agricultural output. Use this dashboard to identify production leaders, monitor changes over time, and assess the reliability of reported figures.

Insights

- Total production increased steadily from 13.8 billion units in 2019 to a peak of 14.25 billion units in 2022, representing a cumulative growth of 3.3% over four years.
- In 2023, production fell by 5.4% to 13.47 billion units, marking a significant decline after two consecutive years of growth.
- The drop in production from 2022 to 2023 breaks the previous upward trend, indicating possible operational or market challenges impacting output.

Total Production Trend by Year

Key Insights

- Production rose steadily from 13.8 B in 2019 to a peak of 14.25 B in 2022, marking a cumulative 3.3% increase over four years
- A notable 5.4% drop occurred in 2023, bringing output down to 13.47 B after two years of growth
- The 2022–2023 decline interrupts the upward trend, signaling potential operational or market challenges
